
New Exide 27 MDP Dual Purpose Battery

Posted by Joe - 2013/08/10 23:54

A guy at work was selling 3 of these deep cycle batteries (brand new) \$75.00 each. I was able to get the last one for \$70.00. It seemed like a good deal. I originally thought that the battery was sealed as I use only sealed batteries (Delco Voyagers) on my boat. If anyone is interested in a new lead acid battery I am trying to get back what I paid for it. Let me know if you are interested as I can bring it to the next club meeting if anyone would like to see it. I am attaching a link to Exide so that you can view the specs. <http://www.exide.com/us/en/product-solutions/transportation/product/exide-nautilus-marine-dual-purpose.aspx> http://outcastbass.com/images/fbfiles/images/Nautilus_dualpurpose_lrg.jpg
