
Bags Bagged a Lunker

Posted by Bassthum - 2009/05/14 20:26

Got this text pic from Joe this morning. He caught it yesterday as today they had 40mph winds. Hope they're not spooning.

Now that I see the pic clearly..... Joe if you keep the fish near your body you can get a good idea how big the fish is. Your fish does not need the exageration. It's a really nice fish!!

I agree Mike. That baby is way over five and maybe over six. But its impossible to tell when it is the same length as his torso. Nice fish Joey. Maybe next time take one shot like that. And then another one with it close.
