I had a chance to Break out some of the new stuff today. Not bad for a 12 year old truck with over 100,000 miles. Nick I didn't have too much time so I didn't break out the rotary. Before:

Nick The poor boys 2.5 took out most of the swirls. But the poor boys 'Black Hole' is awesome stuff. It hid all the scratches.

Jimmy here's a couple of tips for taking car photos.

Always do it at dawn or dusk. Never mid day.

Use a polaroid sunglasses as a filter. put them right in front of the camera lens.

Take the car to an empty parking lot so you don't get any shadows from trees or other overhead stuff.

take a couple of shots from down low. crouch down.
