
Maho 3/20

Posted by Bassbum - 2010/03/22 04:13

Got out on Maho for a few hours with the Cubster.....Big change from last year at this time.

Last year water temps were 38-41 degrees and small grubs were the ticket...

This year it was hair, dragged like you were trying to loose it. Water temps were 41-48 by days end. As you can tell, there was a noticable difference in air temperature....
